

No child should suffer when the right treatment is just a plane ride away.

What We Do

- Miracle Flights provides free commercial flights to those in need of life-changing medical care not available in their local communities.
- Commercial plane tickets are provided at no cost to families and as many times as needed.
- Miracle Flights programs include domestic flights to all U.S.–based medical treatment facilities.

Who We Fly

- Miracle Flights is not disease specific nor is it age restrictive. We will fly anyone with a complex medical need who requires distant medical care.
- Patients under the age of 18 can be joined by up to two parents/legal guardians. Patients 18 or older can have one medically necessary caregiver join them. All flights are subject to household income eligibility with supporting documentation.

Why We Fly

- Almost all Miracle Flights patients suffer from rare conditions for which there are only a select number of experts in the country—which makes medical travel a necessity.
- Many patients with rare conditions go untreated or misdiagnosed, simply because they cannot gain access to the medical experts who can effectively treat their condition.
- While insurance may cover many aspects of treatment, it doesn't cover the cost of travel. That's where Miracle Flights comes in. Miracle Flights alleviates the financial burden of travel so families can focus on treatment and recovery.

Miracle Flights by the Numbers

- **1985:** Miracle Flights is founded in Las Vegas
- **2016:** Miracle Flights celebrates 100,000th flight
- **600-700:** Average number of free flights Miracle Flights provides each month
- **\$20:** Cost to fly a child 25 miles
