## Miracle Flights Friends and Supporters,

After the last several years of challenges and uncertainty, I look to 2023 and beyond with optimism, certainty, and clarity. Never before have the needs of our families come so clearly into focus.

In 1985, Miracle Flights launched in Las Vegas, Nevada as “Angel Plane” delivering blood donations to rural Nevada via small, private aircraft. Today, we are a national nonprofit with **Southwest** as our leading commercial airline partner coordinating **675 flights** each month from coast-to-coast to receive medical care at Centers of Excellence.

Miracle Flights is bridging the gap in the U.S. medical system, helping to **alleviate the financial burden** incurred by many of our families. Over the last year, we have aligned with strategic national partners The Parking Spot and Blacklane global chauffer service to fully complete a family’s medical journey – free of charge. “Miles” the teddy bear is sold in **56 WHSmith North America (formerly Marshall Retail Group) locations** across the country, helping us raise awareness and funds. In addition, WHSmith North America provides much-needed respite areas in their stores for our families who need a pause during their travel journey.

As we look to the future, Miracle Flights will continue to serve anyone flying anywhere – including working with state and local government agencies to provide our services to those traveling to receive treatment for **mental health**.

**With over 91 million miles behind us, our journey has only just begun.**

Sincerely,

**Mark E. Brown**

Chief Executive Officer

With your continued support, we are confident that we can make an even greater impact in the coming years.

Thank you once again for your unwavering support and commitment to the Miracle Flights mission.

**Together, we are changing lives and making a difference in the world, one flight at a time.**

## Thank you Miracle Flights!

My daughter has Complex Regional Pain Syndrome and other rare conditions. She has to travel to Florida from New Hampshire to receive the treatments she needs to help her unbearable pain.

She has constant nerve pain in her leg from this rare neuro inflammatory condition. We have to pay out of pocket for her treatments and it's a constant challenge to provide all the care she needs for these rare conditions. She also has Ehlers-Danlos syndrome, as well as postural orthostatic tachycardia (POTS). As a single mom and caretaker to my disabled daughter, I'm not sure how I would get her to these necessary treatments for her rare pain condition. ***Thank You for all the support you have provided us. We are so grateful.***
